

Course: Operating System

Class ID: 107921

## Project Proposal

# **CONSOLE OPERATED COMPUTER CONTROLLING AND DETAILS DETECTION SYSTEM**

Project Members:

Sno	Student ID	Student Name
1	11508	Muzamil Khan
2	11515	Zain Zahid
3	11200	Muhammad Ahmed

## INTRODUCTION

**CONSOLE OPERATED COMPUTER CONTROLLING AND DETAILS DETECTION SYSTEM** is basically a mini operating system. We tried to make our OS in such a way that user can detect his computer details in one click.

Insha'Allah Our project will be helpful for those beginner users who don't know how to see their system details.

## **GOAL**

- Our goal is to make sure that user can get his important details on one click.
- And specially, we have make sure that our project code will not break at any point Insha'Allah.

## **Project Discription & Features:**

ASCII art have been used for styling of first page and the last page.

We have worked on 7 main features:

- File and directory details system (Save Save Hogi)
- Browsing internet Speed Speed
- See available Wi-Fi
- See previously connected Wi-Fi history
- Processor details and speed
- Ip configuration
- Add voice command

System specs/info

**THANKS😊**
